

VARYSIAN AWARD 2025: METEORAGE RECOGNIZED FOR ITS INNOVATIVE LIGHTNING DETECTION AND EARLY WARNING SOLUTIONS

October 22, 2025

We are proud to have won the **Varysian Global Hydrometeorological Excellence Award 2025** in the category **Outstanding Lightning Detection and Early Warning Solutions**, during its first-ever global ceremony held in Vienna as part of the Meteorological Technology World Expo (MTWE) 2025.

The **Global Hydrometeorological Excellence Awards**, created by Varysian, honor the most innovative and impactful contributions in meteorology, hydrology, and climate services worldwide. An expert jury selected the nominees and identified the winners in each category, highlighting the most influential solutions globally.

This award recognizes our long-standing **commitment to innovation and proactive lightning risk management**, highlighting the effectiveness of our solutions for **real-time storm monitoring, early warnings, and integrating lightning data into decision-making processes**.

Our lightning detection and prevention solutions, used by over 4,000 clients worldwide, enable:

- **Evaluating lightning risks** and optimizing protection systems with advanced statistics and analyses.
- **Anticipating** and acting with **real-time storm alerts**.
- **Monitoring sites** live with precise storm visualization.
- **Improving** inspections and reporting with **detailed strike data**.
- **Integrating lightning data** into operational tools via APIs and data streams.

For nearly 40 years, we have supported professionals in making lightning risk manageable, allowing organizations to operate safely, efficiently, and sustainably.

Our data and analyses support safety, risk management, and operational decision-making across multiple sectors, from energy and industry to insurance.
